INTRODUCING  
the new **GATEWAY**  
**SIGNAGE**  
Franklin Township

PRIMARY: Based on the feedback received by the residents and community leaders, the new gateway signage has been designed to unify Franklin Township as a community, as well as acknowledge the association with the Southwest Area Plan. A stone design has been chosen as a representation of the area's stone quarry history.

SECONDARY: As a more modest solution, secondary signage has been designed to attach to the preexisting Franklin County metal signs. These signs utilize the same design elements as the primary gateway signage.
