

INTRODUCING the new GATEWAY SIGNAGE Pleasant Township

PRIMARY: Based on the feedback received by the residents and township officials, the new gateway signage has been designed in the shape of Pleasant Township, with Big Darby Creek running through it. The new design has been chosen as a friendly and inviting first impression.

SECONDARY: As a more modest solution, secondary signage has been designed to attach to the preexisting Franklin County metal signs. These signs utilize the same design elements as the primary gateway signage and are deep green to compliment the existing signs.
