

## Regional Coordination

- The Southwest Area Commission should serve a communication and coordination role for all the jurisdictions within the area.
- Coordinate with other public agencies in the area to pursue the design and construction of a community facility at the former Franklin County Children Services site at Frank and Gantz Roads.
- An integrated greenway system following MORPC and city of Columbus plans should be developed.
- Local governments should coordinate among each other and with the Ohio Department of Transportation to ensure sidewalks and bike paths are included in all road projects within the area.
